COASTAL ENGINEERING

Contents Volume 27, 1996

Research papers

Wave energy transformation on natural profiles
T.C. Lippmann, A.H. Brookins and E.B. Thornton 1

Extreme waves in shallow and intermediate water depths
T.E. Baldock and C. Swan 21

An experiment on harbour resonance induced by incident regular waves and irregular short waves
P. De Girolamo 47

Sediment suspension in oscillatory flow: measurements of instantaneous concentration at high shear
C. Staub, I.G. Jonsson and I.A. Svendsen 67

Dynamic response of fluid mud in a submarine trench to water waves
F.C.K. Ting and W.J. Lemasson 97

Book reviews

Hydroelasticity in Marine Technology, by O. Faltinsen et al. — Per Bruun 123

Physical Models and Laboratory Techniques in Coastal Engineering, by S.A. Hughes — E. Mansard 124

Ocean Disposal of Wastewater, by I.R. Wood et al. — G. Lawrence 126

Announcement 129

Research papers

Dynamics of surf-zone turbulence in a spilling breaker
F.C.K. Ting and J.T. Kirby 131

Wave set-up on coral reefs. 1. Set-up and wave-generated flow on an idealised two dimensional horizontal reef
M.R. Gourlay 161

Cross-shore hydrodynamics and profile response modeling
R. Srinivas and R.G. Dean 195

Correlation between individual waves in a real sea state
R.J. Sobey 223

Bed shear stress coefficients for longshore currents over a barred profile
D.J. Whitford and E.B. Thornton 243

Wave forces on vertical cylinders upon shoals
A. Kyte and A. Tørum 263

Book review

Offshore Structural Modelling, by S.K. Chakrabarti — R.T. Hudspeth 287

Announcement 289

Contents Volume 27 (1996) 291
